

WORKS NOTIFICATION

TRAM POLE INSTALLATION WORKS - PARK STREET, SOUTH MELBOURNE **7 - 23 DECEMBER 2017**

Major works on the Metro Tunnel Project are now underway in Domain to support construction of a new underground station.

What we are doing

As you may be aware, in February 2018 the Park Street, South Melbourne tram stop will be relocated to accommodate tram services during the construction of the Metro Tunnel.

From 7 - 23 December 2017, Yarra Trams will be undertaking ground investigation work and installing new tram poles and overhead tram power cables in preparation for these works.

These works involve

Day Works:

- Saw cutting pavement and potholing
- Subsoil testing.

Day and Night Works:

- Excavation of the pole holes and concreting foundations along Park Street using non-destructive digging (NDD)
- Pole erection using specialised crane and equipment and concreting the poles into place
- Clean up and reinstatement of footpaths
- Overhead tram power cables and support system works.

What to be aware of

- All construction activities will be managed in accordance with Metro Tunnel Project Environmental Performance Requirements (EPRs)
- These works have been granted the relevant planning approvals to proceed
- There will be some medium to high level noise associated with these works, particularly saw cutting, excavation, drill-rig operation, chainsawing and NDD, machinery and general operation of plant and equipment
- Tree pruning and removal will be required to provide a safe distance from tram power cables
- Access to private properties and businesses will be maintained at all times
- Pavements will be reinstated at completion of work.

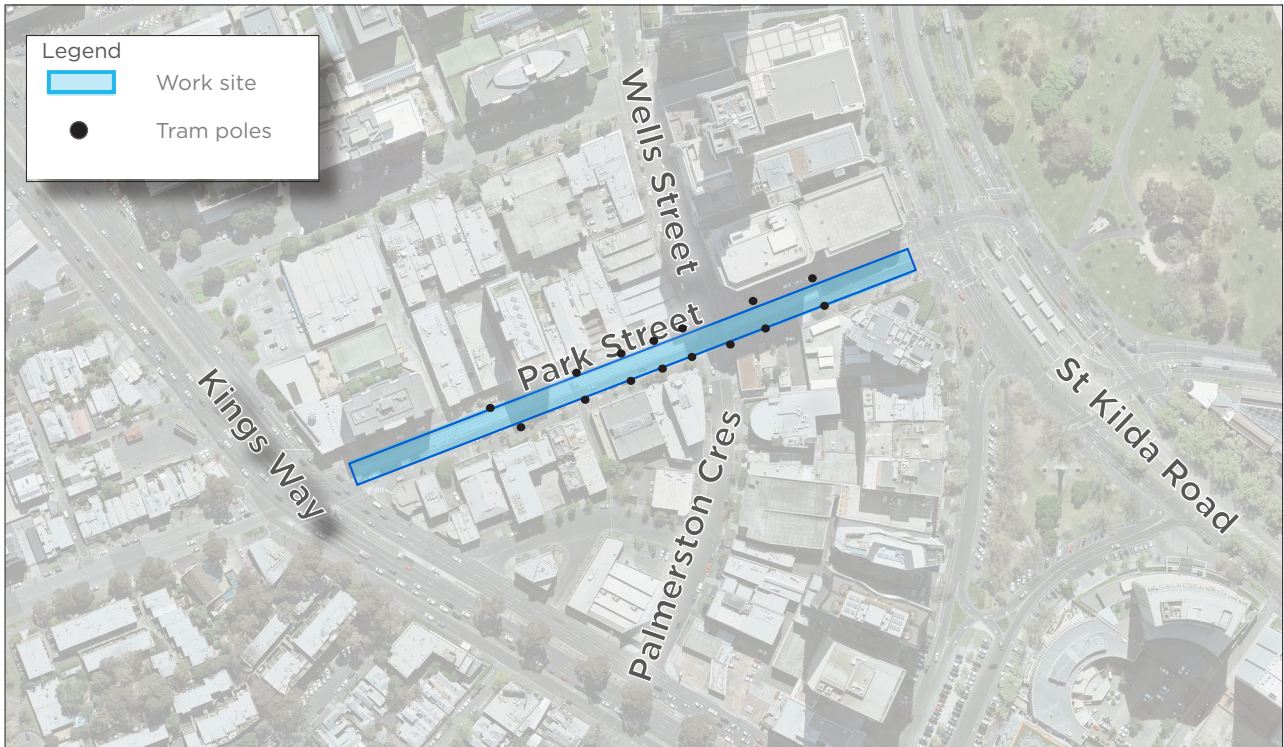

Traffic impacts

- Traffic management will be in place to manage the safety of work crews, pedestrians, cyclists and motorists and maintain flow of traffic
- Tree pruning and removal may require intermittent lane closures
- We may need to temporarily occupy a limited number of parking spaces along Park Street
- Works will take place outside of afternoon traffic peak to reduce impacts on peak-hour traffic movements.

Legend

- Work site
- Tram poles

When

It is estimated that these preparation works will take approximately two weeks.

- 7 - 23 December: Preliminary NDD investigation work, pole installation
- 17 - 23 December: Overhead works, feeder cables and overhead support system installation.

Day Works

- 7am - 4pm, Monday to Friday
- 7am - 5pm, weekends.

Night works

Night Works will be required to minimise the impact to traffic due to roadside installation work and will take place between 7pm - 5am, from 11 - 21 December, with the exclusion of Friday 15 December and Saturday 16 December.

All reasonable efforts will be made to complete works ahead of schedule, subject to weather and ground conditions.

We will notify residents and businesses if there are any significant changes to the program.
