

WORKS NOTIFICATION

NIGHT WORKS, KENSINGTON 6 – 13 FEBRUARY 2018

Works in preparation for major construction of the Metro Tunnel Project are now underway across Melbourne. In Kensington, these works include the removal and relocation of high voltage (HV) transmission towers along Childers Street.

John Holland has been appointed as the Managing Contractor for this package of works.

What we are doing

Construction of a new HV transmission tower on the southern side of the rail corridor.

Works will include:

- Drilling activities to prepare for piling works
- Piling works to support the foundations of the new HV transmission tower.

When

- 6pm – 4am, Tuesday 6 to Tuesday 13 February 2018
- These dates are subject to change, and any changes will be notified in advance.

What to be aware of

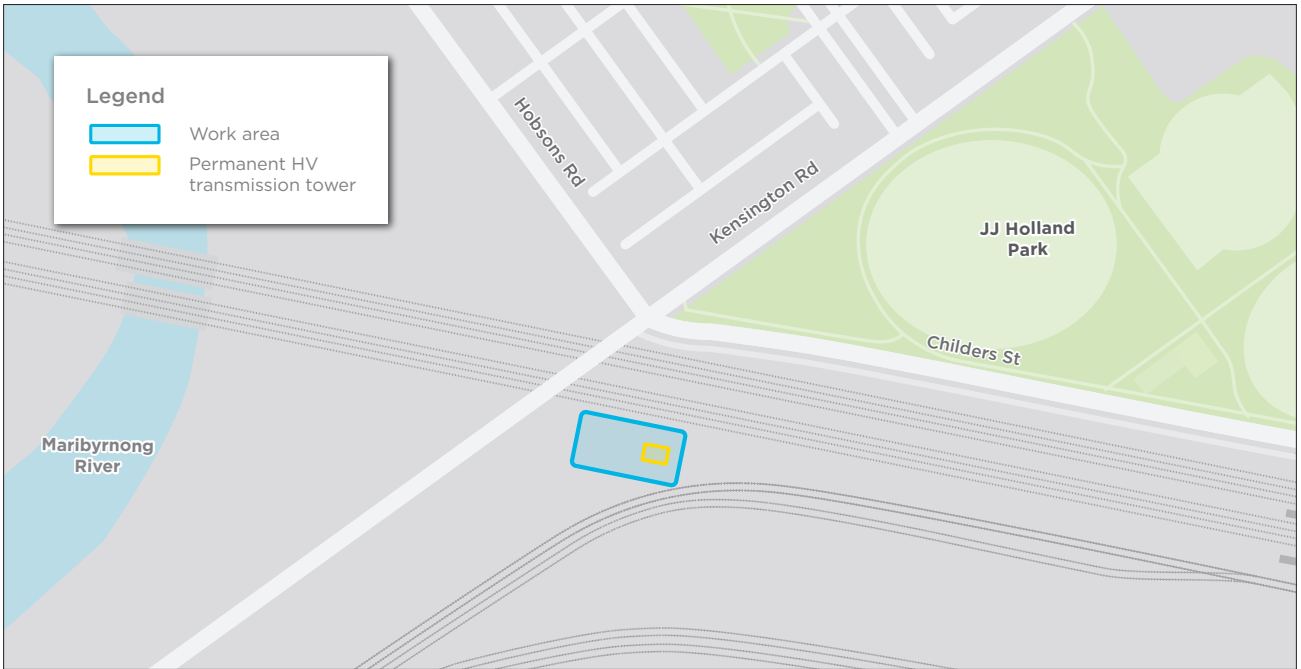

Due to the proximity of the new HV tower to the live rail line, these works need to take place at night when trains aren't running.

These works are expected to create high levels of noise and some vibration at the source. We are conducting an assessment of these works to determine potential noise impacts on residents in the surrounding area, and will provide an update to any residents potentially adversely affected by noise from out of hours works.
