

## WORKS NOTIFICATION

# HIGH VOLTAGE TOWER CONSTRUCTION HOBSONS ROAD, KENSINGTON 31 JULY TO LATE OCTOBER 2017

Works in preparation for major construction on the Metro Tunnel Project are now underway across Melbourne. In Kensington, these works include the removal and relocation of high voltage (HV) transmission towers.

John Holland has been appointed as the Managing Contractor for this package of works.

Due to the complex nature of this work, it needs to be undertaken in stages.

In order to facilitate the relocation of the HV transmission towers, a temporary tower will need to be positioned on the corner of Hobsons Road and Kensington Road. We envisage that this tower will be in place for up to six months until a permanent tower is built.

### What we are doing

- Constructing a piling pad and hardstand to support the crane which will be used to install the new temporary tower
- Construction of the temporary tower, which will include piling (using a driven piling machine), prefabrication and erection of steel sections with a crane.

### What to be aware of

- There will be a medium to high level of noise associated with piling activities
- Traffic management measures will ensure the safety of work crews, cyclists and pedestrians and maintain flow of traffic
- There will be some temporary pedestrian path diversions on Kensington Road and Hobsons Road
- Access to private properties and businesses will be maintained at all times

### When

- From Monday, 31 July to late October 2017
- 7am - 6pm, Monday to Friday
- 7am - 1pm, Saturdays.

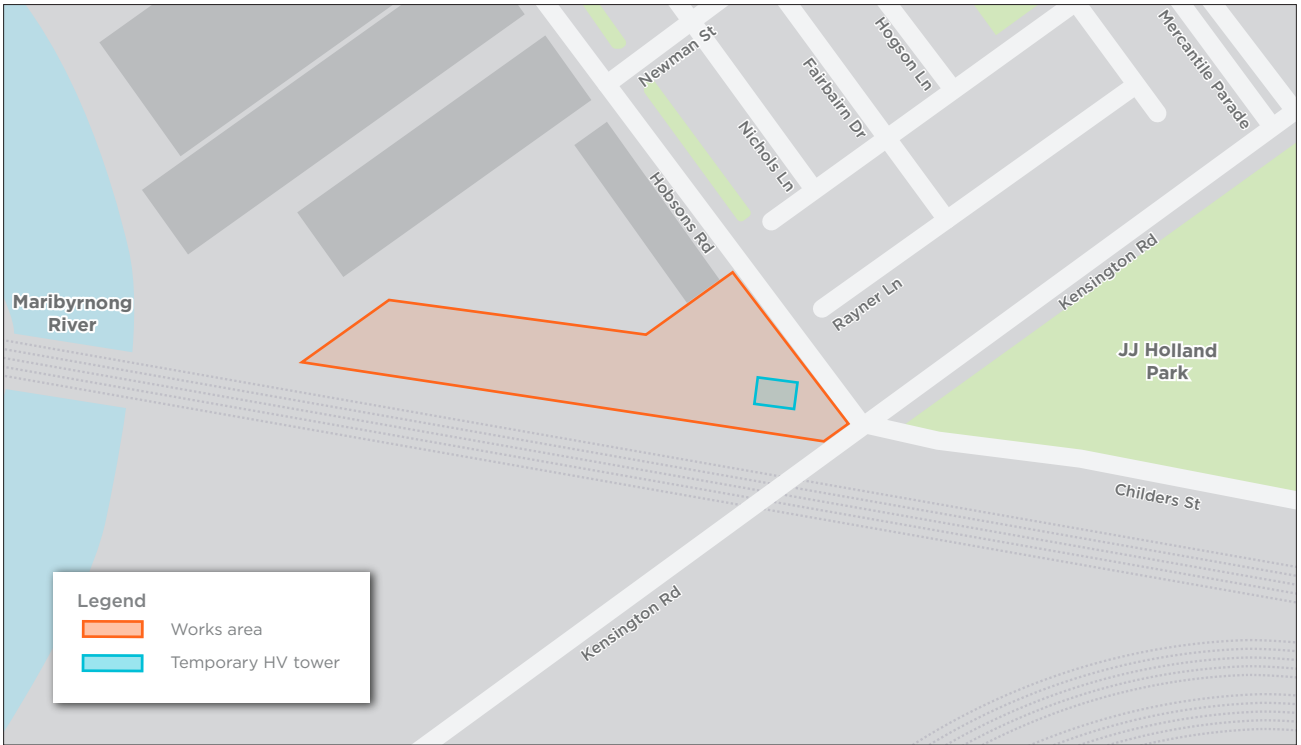

All reasonable efforts will be made to complete works ahead of schedule, subject to weather and ground conditions.

We will notify residents and businesses if there are any significant changes to the program.
