

WORKS NOTIFICATION

GEOTECHNICAL TESTING, EDMUND HERRING OVAL 12-13 APRIL 2017

Major works on the Metro Tunnel Project are now underway to support construction of a new underground station in Domain.

Ahead of construction on the tunnels and stations commencing in 2018, works are required in Edmund Herring Oval to provide a dedicated construction power supply for the tunnel boring machines that will be used to construct the Metro Tunnel.

Beon Energy Solutions has been appointed as the contractor for this package of works.

What we are doing

We will be undertaking geotechnical testing at the edge of Edmund Herring Oval (near Domain Road) to obtain soil samples and help us gain a greater understanding of local geological conditions. This will involve:

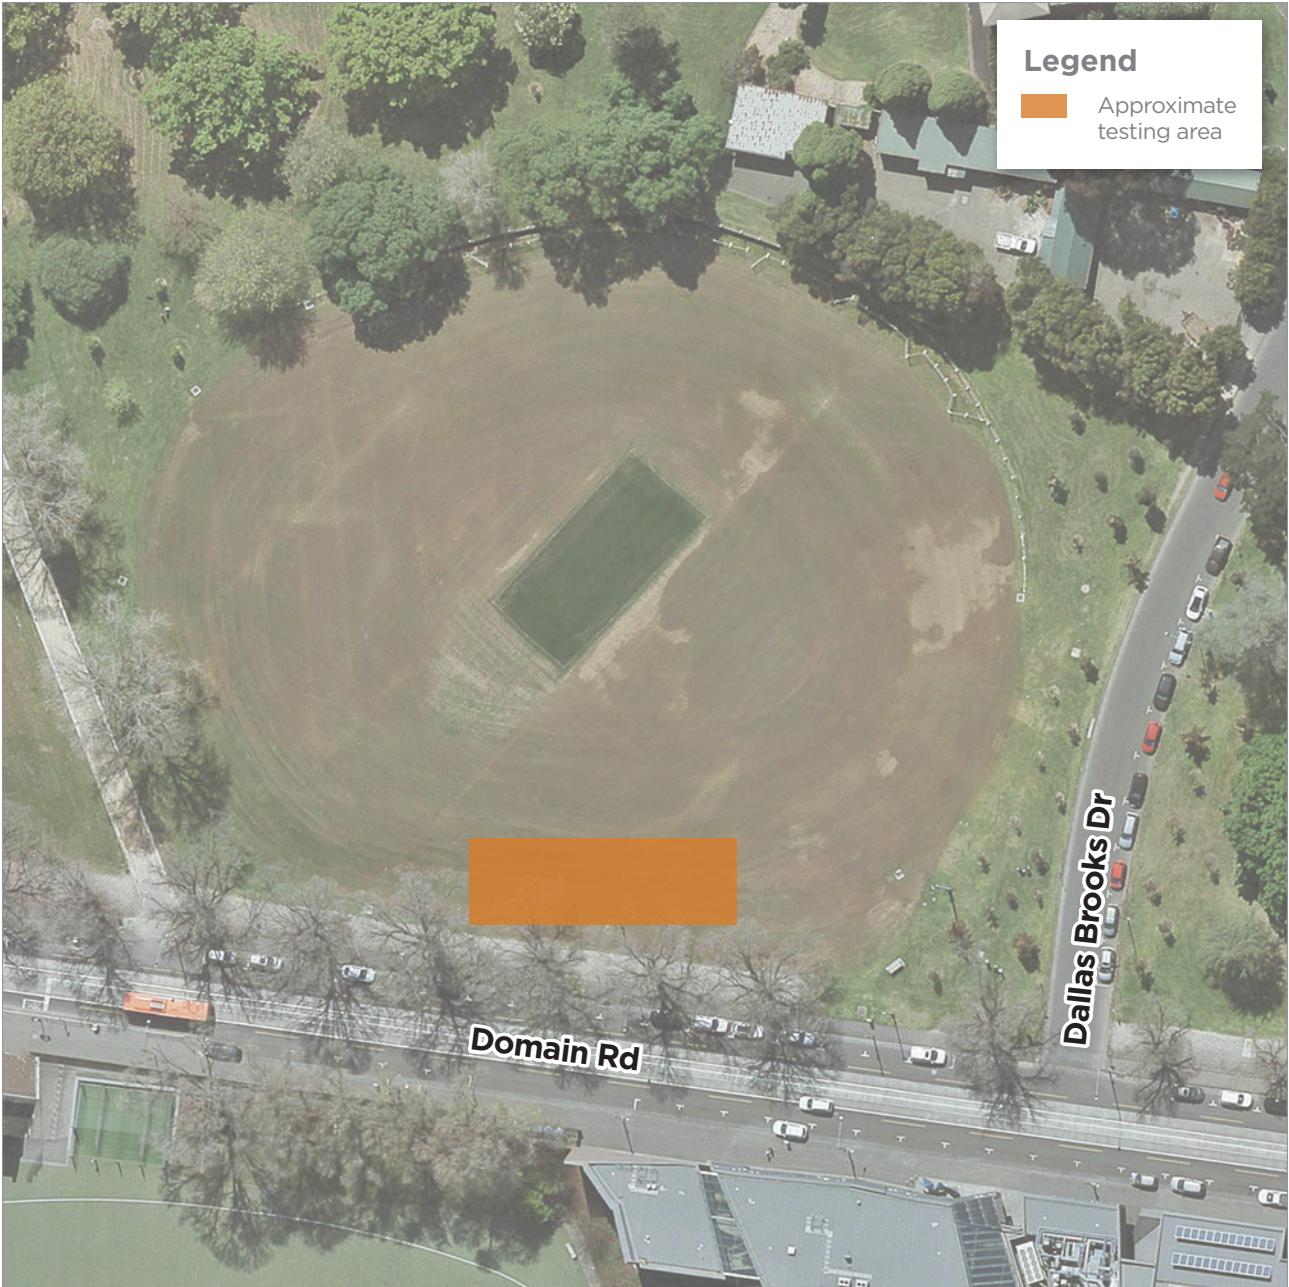

- Setting up temporary fencing around the site
- Checking the site for underground services using non-destructive digging techniques
- Drilling into the ground to test ground conditions and take samples
- Reinstating the site.

What to be aware of

- Where required, traffic management will be used to direct vehicles, cyclists and pedestrians safely around the work sites (please follow any signage in place)
- These works are expected to be low-impact, however there may be some noise generated when non-destructive digging is taking place
- The noise generated by subsequent geotechnical drilling will be similar to that of an idle truck engine.
- The site will be restored to its original (or similar) condition once all works are complete.

When

- 7am-6pm, Wednesday 12 and Thursday 13 April 2017
- We will notify residents and businesses if there are any significant changes to the program.
