

WORKS NOTIFICATION

POWER POLE INSTALLATION, WILLIAM AND OSBORNE STREETS, SOUTH YARRA 3 JULY - EARLY AUGUST 2017

Works in preparation for major construction of the Metro Tunnel are continuing in the Eastern Portal precinct, with the relocation of water, gas, power and telecommunication utility services underway.

What we are doing

From 3 July, works will commence to install new lighting power poles in Osborne Street, install an underground power supply and remove existing overhead power cables across William Street bridge, South Yarra.

Osborne Street:

- Saw-cutting the road and footpath, excavating the trench and installing new power conduits beneath the road
- Installing a pit and two new power poles, which will involve non-destructive digging (NDD) to create the hole which the new poles will be lifted into, and concreting of these holes
- Hauling the power cables through the new conduit and running the cable up the new power poles
- Reinstating the area, including backfilling and compacting the area and re-asphalting the road.

William Street:

- Saw-cutting the road, excavating the trench, laying new conduits, backfilling and compacting the area and reinstating the road
- Installing a pit and one power pole (with one already having been installed).

What to be aware of

- There will be periods of medium-high level noise associated with open cut trenching, saw cutting and NDD
- Traffic within Osborne Street will be maintained, with localised temporary occupation of kerbside parking in proximity to the works, and some minor disruption to traffic associated with trenching
- We will notify affected property owners ahead of any works that affect their driveway access
- Impacts from noise will be managed in accordance with the Metro Tunnel's Environmental Performance Requirements
- Work sites will be reinstated at the conclusion of works.

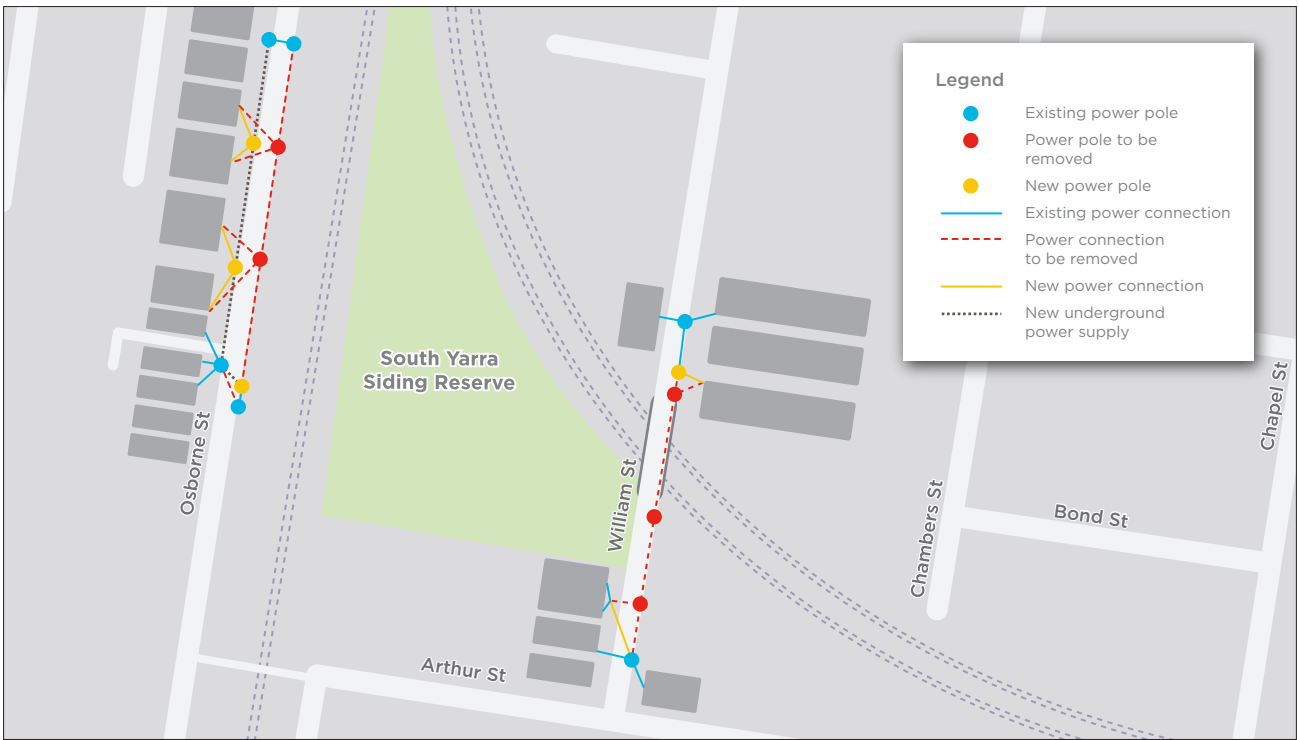

When

- 7am - 6pm, Monday to Friday
- 7am - 1pm, Saturdays.
