

WORKS NOTIFICATION

HIGH VOLTAGE TOWER CONSTRUCTION UPDATE, KENSINGTON APRIL 2018

Works in preparation for major construction of the Metro Tunnel Project are underway in Melbourne. In Kensington, these works include the removal and relocation of high voltage (HV) transmission towers along Childers Street and the rail corridor.

Works to construct permanent tower 33 near the corner of Hobsons and Kensington roads and permanent towers 34 and 35 on the south side of the rail corridor are continuing. Once the towers are erected, works to install conductors and stringing of the HV transmission lines between towers will occur.

These works are taking place in stages and will involve:

- Activities to complete the permanent tower 33 foundations
- Delivery and pre-assembly of steel sections using oversize vehicles
- Erection of the permanent HV towers using cranes
- Safely stringing the transmission lines between permanent tower 33 on Hobsons Road and permanent tower 34, and from permanent tower 34 to permanent tower 35 (both on the southern side of the rail corridor).

When

- 7am – 6pm, Monday to Friday
- 7am – 5pm, Saturdays
- 7am – 5pm, Sunday 8 and Sunday 15 April
- 9pm – 5am, Sunday to Thursday (from Sunday 15 April until late April)
- Some works need to occur outside of working normal hours due to the proximity of the works to the live rail corridor. In order to ensure the works can be performed safely, some activities need to be undertaken at night when trains are not running.

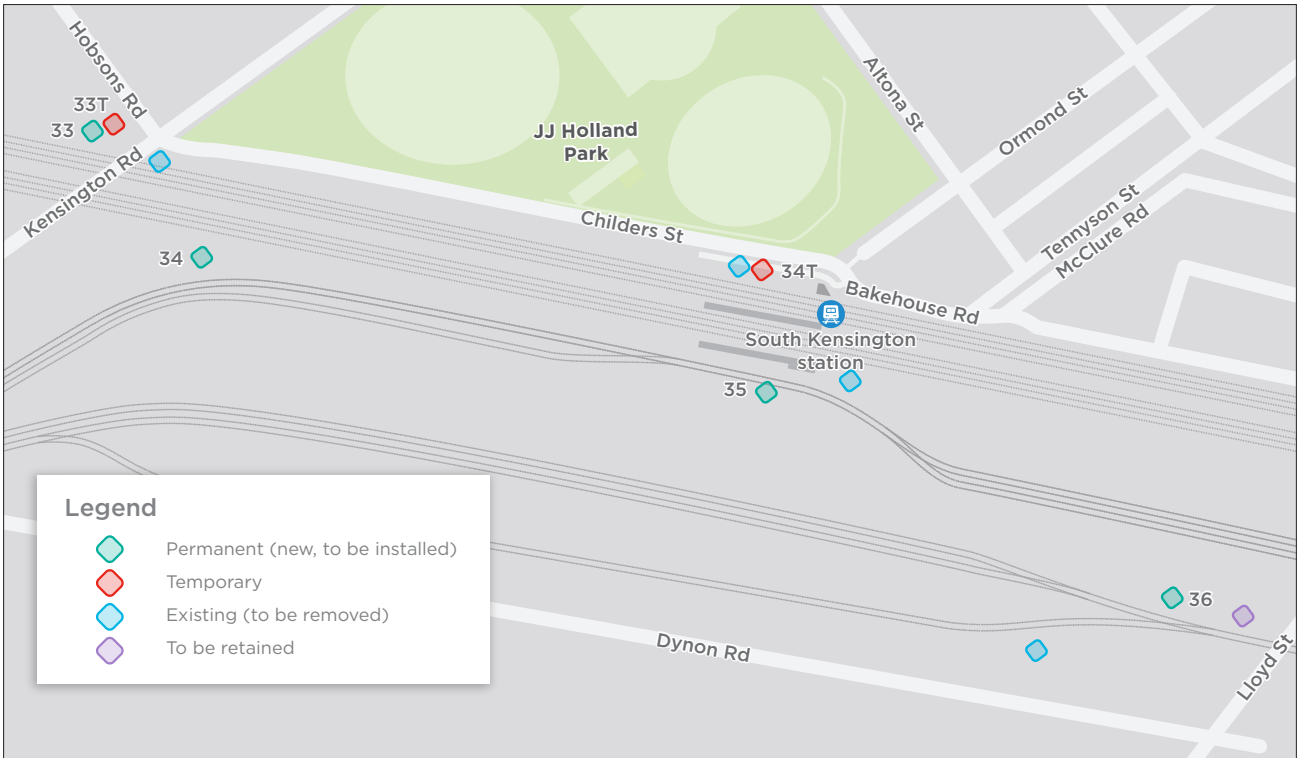

What to be aware of

- These works are expected to generate intermittent periods of medium level noise
- The works will involve the use of winches, cranes and elevated work platforms
- Construction lights will also be used and powered by a low noise generator
- We will position lights so they face away from residential properties, where possible
- Please note the dates of these works are subject to change and we will notify in advance if there are any revisions to the program.

Construction partners:

Indicative only.
