

RAIL INFRASTRUCTURE ALLIANCE

WORKS NOTIFICATION

OUT OF HOURS WORKS SUNSHINE STATION 19-21 JANUARY 2019

Metro Tunnel will free up space in the City Loop to run more trains to and from the suburbs by taking our busiest train lines through a new tunnel under the city. That means more trains, more often across Victoria, with a less crowded and more reliable train network. Work to build the twin 9km tunnels and five new underground stations is now underway.

The Metro Tunnel will create a new end-to-end rail line from Sunbury in the west to Cranbourne/Pakenham in the south-east, with high capacity trains and five new underground stations. As part of the Metro Tunnel Project, we need to undertake site and service investigations along the Sunbury line to help inform detailed planning and design.

What we are doing

- Geotechnical testing involving a drill rig to investigate the ground conditions.

When

- 9pm, Saturday 19 January to 4am, Monday 21 January
- Works will be undertaken 24 hours during this period.

What to be aware of

- To undertake these works safely, they need to be performed when trains are not operating
- The works are expected to generate periods of medium level noise
- The noise generated by subsequent geotechnical drilling will be similar to that of an idling truck engine

- Use of light towers will be required during construction of the temporary rail crossover (an asphalted section of rail) within the rail corridor. We will position lights so they face away from residential properties, where possible
- Construction vehicles will be accessing the rail corridor next to Derby Road (see map overleaf).

Travel changes

So the 24 hour works can take place safely, buses will replace trains from 9pm, Saturday 19 January until the first service Monday 21 January on the following lines:

- Sunbury line: between North Melbourne and Sunshine
- Werribee and Williamstown lines: between North Melbourne, Newport and Williamstown.
