

Works Notification

Site establishment and out of hours works

205 Oakview Lane, Nar Nar Goon

3 February to 6 March 2020

Construction is underway on the Metro Tunnel which will create a new end-to-end rail line from Sunbury in the west to Cranbourne/Pakenham in the south-east, with high capacity trains and five new underground stations. As part of the project, work is being undertaken at the Pakenham East Depot to establish a test site for High Capacity Signalling.

We are establishing a construction site at 205 Oakview Lane, Nar Nar Goon throughout February which will enable us to access the High Capacity Signalling platform and test track within the Pakenham East Depot.

From Monday 2 to Friday 6 March we will undertake 24/7 works on the test track to install the trackside equipment and technology needed to test High Capacity Signalling with the new High Capacity Metro Trains (HCMTs).

About High Capacity Signalling

Next-generation High Capacity Signalling is the technology that will be installed in the Metro Tunnel to deliver more trains during peak periods. This technology will revolutionise Melbourne's train network as we move towards a 'turn-up-and-go' network like other cities such as London, Singapore and Hong Kong.

What we are doing

- Installing temporary site buildings and concrete walkways
- Erecting an overhead canopy
- Installing temporary fencing, water barriers and car parking areas
- Installing trackside equipment
- Trenching and installation of cable.

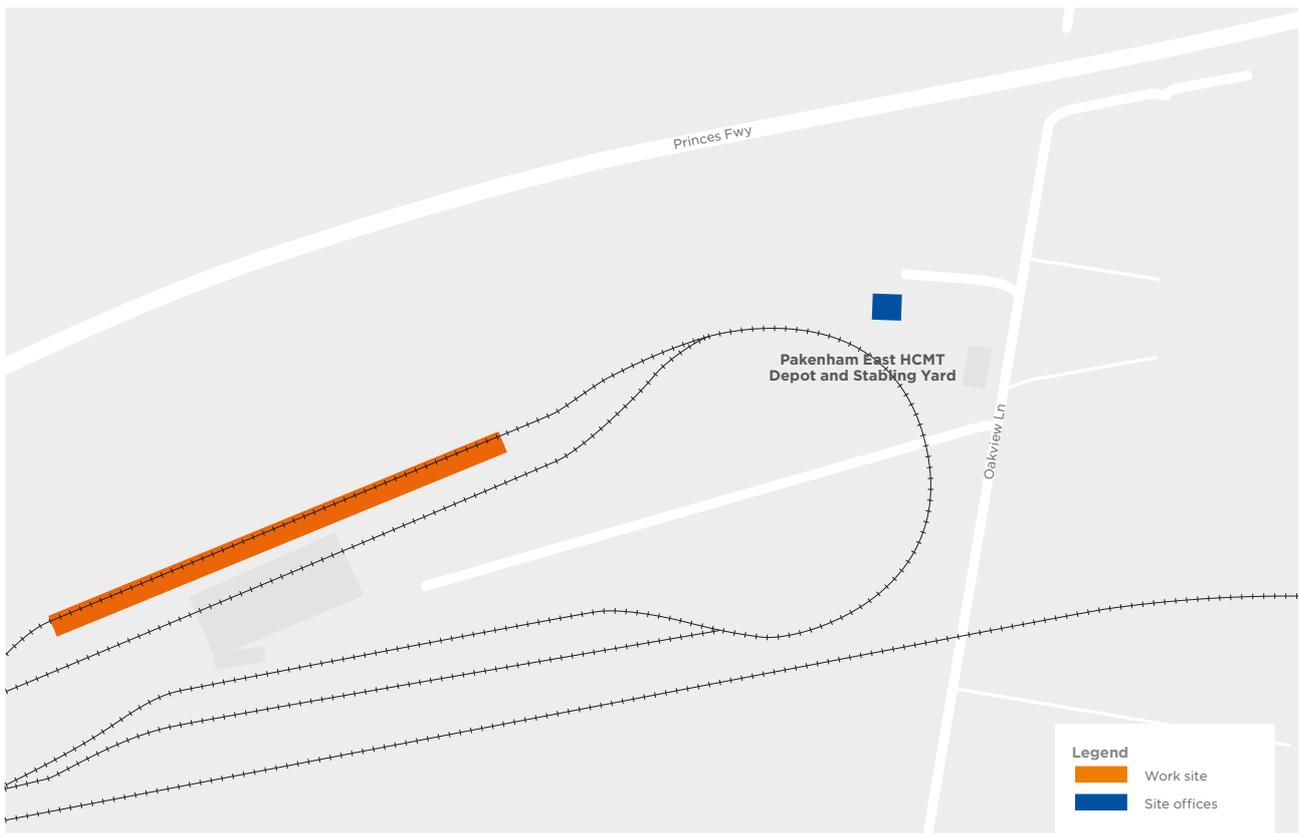

When

Site establishment:

- Monday 3 to Saturday 29 February 2020
- 7am to 6pm, Monday to Friday
- 7am to 1pm, Saturdays.

24/7 works:

- Monday 2 to Friday 6 March 2020.

What you should be aware of

- Medium levels of construction noise are expected
- We will attempt to carry out noisy construction activities during daytime construction hours
- The site office will be powered by a generator during daytime construction hours
- The generator will be used during 24/7 works in March. It will be turned off whenever possible
- The site laydown area will be accessed 24/7 during works to transport materials to and from site
- Machinery such as excavators, a telehandler, concrete trucks, crane, franna, dump truck, Hi-Rail Hiab, a generator and lighting towers will be used
- Increased truck and machinery movements on Oakview Lane, Nar Nar Goon
- The site will be used as a site office and for delivery and storage of construction materials and equipment.

If you would like to talk to a member of the project team to find out more information about these works, please call 1800 105 105.
