

IMPORTANT UPDATE

OUT OF HOURS ACTIVITIES FROM 5 MARCH 2019

The second of the two tunnel boring machines (TBMs) to dig the Metro Tunnel will be delivered to the Arden construction site from early next month.

From 5 March, for a period of approximately two weeks, TBM parts will be delivered to site by heavy vehicles. Oversized deliveries will occur at night when roads are quieter with a small number of these deliveries travelling with vehicle escorts.

Non-oversized deliveries will occur during the day.

Trucks will travel from the Port of Melbourne to the construction site via an approved transport route that includes Dynon Road, Dryburgh Street and Arden Street. Deliveries will enter site via Arden Street wherever possible, although there may be some instances when deliveries must enter the site via Laurens Street.

Once at site, a crawler crane will be used to lift the TBM parts off the trucks so they can be stored on site and, later, moved into the station box where the TBM will be assembled.
