

WORKS NOTIFICATION

PILE INSTALLATION SHORT STREET, FOOTSCRAY **17-21 FEBRUARY 2020**

Major construction is continuing along the Sunbury rail corridor in preparation for the Metro Tunnel. We will soon commence installation of a new overhead wire structure in the rail corridor at Short Street, Footscray. These works form part of the power upgrades that will enable new High Capacity Metro Trains (HCMTs) to run through the tunnel.

What we are doing

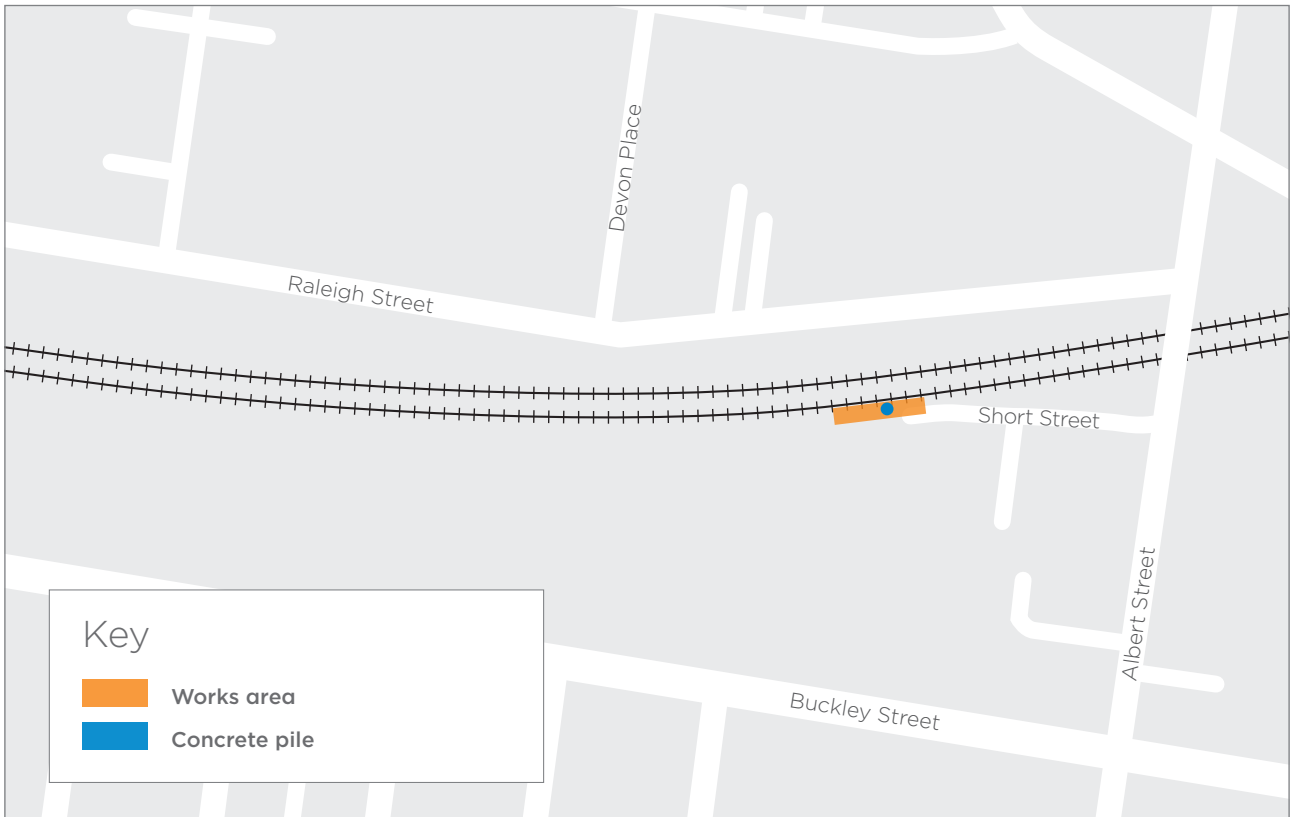

- Non-destructive digging to investigate ground conditions and confirm the area is free of underground services
- Using an excavator to dig a hole and then pouring concrete to create a pile forming the foundation of a new overhead wire structure.

When

- 7am to 6pm, Monday 17 February to Friday 21 February.

What to be aware of

- These works are expected to generate medium levels of noise
- Construction vehicles including an NDD truck, excavator and dump truck will access Short Street via Albert Street
- Access to Short Street will be maintained during these works, however traffic controllers will be present at times to manage material deliveries and assist with construction vehicle and pedestrian movements around the site.
