

# Works Notification

## 24-hour rail corridor works Kensington

**Friday 3 September to Wednesday 8 September 2021**

As part of works in September to connect the new Metro Tunnel to existing rail lines, out of hours works will take place to install overhead structures and cabling services along the existing Sunbury line.

### What we are doing

#### Rail corridor works

- Constructing overhead structure foundations, installing overhead structures, signalling cable assets, underground cable services and conduits within the rail corridor on the Maribyrnong bridge
- Works will require the use of elevated work platforms, generators, non-destructive digging (NDD) trucks, coring drills, concrete trucks, excavators, and crews with hand tools
- NDD is required to locate and expose underground services. NDD uses pressurised water to dig and then vacuum up the soil to expose assets and services underground without damaging them
- Vacuum blasting will take place on the Maribyrnong rail bridge to safely remove lead paint from a rail mast. Vacuum blasting removes hazardous materials while simultaneously collecting them to ensure materials do not enter the environment.

### When

- 24/7 from 6pm, Friday 3 September to 7am, Wednesday 8 September 2021

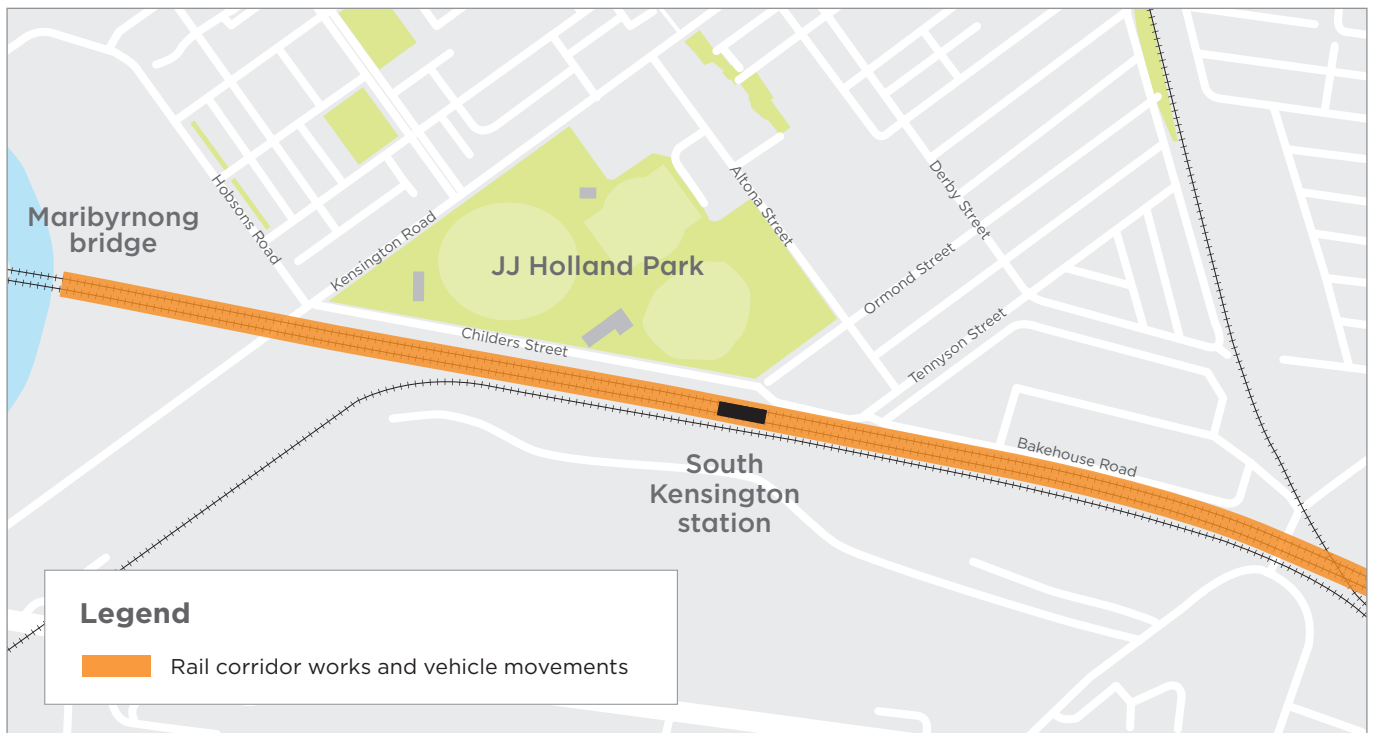

### What you should be aware of

#### Light and noise impacts

- These works are expected to generate medium levels of noise with some high-level peaks during vacuum blasting and NDD works
- Generator-powered lighting towers are required while we complete night works. Where possible, lights will be positioned to face away from residential properties and noise reduction mats will be placed around generators.

#### Traffic impacts

- Additional truck movements will be required during the 24-hour rail works.

### Health and safety

The Metro Tunnel has been designated a critical state infrastructure project under the latest restrictions. Work is continuing safely with strict COVIDSafe plans in place and we'll continue to comply with all directions from the Chief Health Officer.

We are managing the number of staff attending our worksites, as well as implementing preventative measures to ensure community safety.

Safety measures across the site include temperature screening, additional protective equipment including masks, daily health screening of workers, enhanced cleaning, staggered shifts and break times, and physical distancing.

For more information about coronavirus (COVID-19) visit [coronavirus.vic.gov.au](https://www.coronavirus.vic.gov.au).

### Travel Changes

Buses will replace trains in September to allow the 24-hour works to take place.

For journey planning and service information please visit [ptv.vic.gov.au](https://ptv.vic.gov.au) or call **1800 800 007**.
