WORKS NOTIFICATION

OUT OF HOURS WORKS KENSINGTON

30 JANUARY - 1 FEBRUARY 2019

This notification provides information about upcoming out of hours works in Kensington to complete a water pump test.

Further to the water pump test undertaken in December 2018, we wish to inform you of a water pump test required in JJ Holland Park.

This test is required to better understand the ground conditions prior to constructing the western tunnel entrance.

What we are doing

• Setting up equipment within JJ Holland Park
• Pumping water from the ground into a truck located at Bill Vanina Pavilion for a continuous 24-hour period.

When

• 7am-6pm, Wednesday 30 January
• Testing from 7am Thursday 31 January to 7am Friday 1 February. We anticipate the test will take 24 hours to complete, however, if required, water testing will continue until 5pm Friday 1 February.

What to be aware of

• Approximately one truck per hour will transport water from Childers Street to the Hobsons Road site
• The works are expected to generate constant periods of medium level noise during water pumping, and from the use of generators. Intermittent periods of medium to high level noise may be associated with trucks movements
• Use of light towers will be required at the Hobsons Road site and in JJ Holland Park. We will position lights so they face away from residential properties, where possible. Generators are required to power the light towers
• There will be no impact to the pedestrian path within JJ Holland Park
• Workers will utilise the Hobsons Road site facilities.

For more details on these works, please see the construction information overleaf or visit metrotunnel.vic.gov.au
