Major construction is continuing in Domain at the site of the future Anzac Station. This update provides an outline of current and upcoming works in your area throughout November.

Construction snapshot

Construction works are continuing within the Domain precinct during November and will include:

• Tunnel boring machine delivery, assembly and support works
• Acoustic shed construction
• Diaphragm wall construction
• Piling works
• Base slab construction
• Excavation of the station box
• Ground and environmental investigation works.

Some works outlined in this notification may extend beyond November.

Further information on these works can be found overleaf or at metrotunnel.vic.gov.au.

When are we working?

Normal construction hours
7am to 6pm, Monday to Friday
7am to 1pm, Saturdays

Some activities may be required to continue slightly past these hours. All efforts will be made to complete activities as scheduled.

Out of hours
Some works are required to take place out of normal construction hours. The timing of these works are outlined in the construction information overleaf.

24 hours
24 hour works are sometimes required during peak construction activities. The timing of these works are outlined in the construction information overleaf.
**WORKS IN YOUR AREA**

**Tunnel boring support works**
Edmund Herring Oval and station box site  
**Ongoing**
- Cabling and pipe works continue to connect the tunnel boring machine support site at Edmund Herring Oval to the station box site where the tunnel boring machines (TBM) will be launched
- During November, sections of the TBMs will begin to arrive at the station box site. Deliveries are currently scheduled for the 8, 13 and 22 November. Please see the oversized transport section for more information.

**Acoustic shed construction**
Station box site  
**Ongoing until late February 2020**
- Construction of the acoustic shed will continue in November
- Installation of the three overhead gantry cranes inside the shed will continue until late November
- The gantry cranes will assist in lowering tunneling equipment through the void in the roof slab into the station box
- The acoustic shed is being constructed to minimise noise during 24/7 tunnelling activities which will begin mid 2020.

**North box construction**
Station box site  
**Ongoing 24 hours a day, Monday to Friday and 7am to 6pm on Saturdays**
- Excavation through the voids in the northern section roof slab will continue until late November
- Excavation activities under the station roof include the use of earth movers and excavators
- At surface level, an excavator will remove soil from inside the station box and into trucks
- Base slab construction will take place 24 hours from 7am Mondays until midnight Fridays
- Installation of formwork, steel fixing, concrete pours, craneage and waterproofing are required as part of base slab construction
- During north box construction, above and below ground walkway lighting will remain on for the safety of workers. Directional lighting for works will be orientated away from residents where possible
- These works are expected to generate low to medium noise.

**Site establishment works**
Station box site  
**Ongoing**
- Site establishment works will continue in November to prepare for piling works and the final section of diaphragm wall (D-Wall)
- This will include breakout of the old road and tram tracks and demolition of retaining walls
- Permanent fencing and gates will be installed across the site in November
- Piling platforms will be built to support machinery
- Piling platforms include excavation of the top layer of soil and relocation of any existing utilities. The excavation is then backfilled with a layer of crushed rock which is compacted using a roller. A slab of concrete will then be poured on top to create a flat surface
- Site establishment works are expected to generate a high level of noise and some vibration.

**Diaphragm wall construction**
Station box site  
**Ongoing until late March**
- To connect the northern section of the station box walls and the southern section station walls (now under the newly aligned St Kilda Road), D-Wall construction will recommence in the station box site
- A D-Wall is a structural concrete wall constructed by first excavating a deep trench. A reinforcement cage is then lowered into the trench and filled with concrete
- D-Wall construction must be continuous to ensure structural integrity. Therefore, these activities may need to continue outside of normal construction hours
- These works are expected to generate low to medium levels of noise and some vibration during trench excavation.

**Investigations works**
Corner of Arnold Street and Toorak Road  
**Late November into December**
- Investigations are continuing in Domain to assess ground and environmental conditions
- These investigations will build on previous work to finalise design and construction methodology for the twin nine-kilometre tunnels
- Further details of these works will be provided close to the start date.

**Oversized transport**
St Kilda Road and Edmund Herring Oval  
**Between 1am and 7am**
- During November oversized equipment, including the tunnel boring machines, will need to be taken to and from site during the early morning. This equipment needs to be transported at this time to minimise impacts on road and tram networks
- Deliveries will be made to construction sites via St Kilda Road between 1am and 7am. All delivery vehicles will be fitted with broadband reverse beepers
- Wherever possible trucks will park inside site and be unloaded in the morning. Extra large delivery trucks will need to be unloaded using cranes between 1am and 7am.
LOOKING BACK AT OCTOBER

October saw the successful delivery of the St Kilda Road realignment. A big thank you to residents, businesses, commuters, pedestrians, cyclists and motorists for your ongoing patience during these important works. Realigning the world’s busiest tram corridor in two weeks was a complex exercise and the project team would like to thank everyone in the area for helping make it happen.

Botanical inspired art at Domain

Take a look at the stunning artwork along the site of the new Anzac Station by Caitlin Klooger, titled ‘Watercolour Herbarium’. This artwork was developed as part of a partnership with the Royal Botanic Gardens and inspired by the State Botanical Collection at the National Herbarium of Victoria.

Caitlin said, “True to my love of Australian flora, I focused on native plants with a few Australian birds and butterflies added to the mix.”

The Metro Tunnel Creative Program is also proud to be working with Melbourne Grammar School and a number of their students, who will create works as part of the program’s theme ‘Storytelling’, considering the past, present and future in relation to transport, and the history of the local area. These new works are anticipated to be erected on hoardings near the school in the coming months.

Traffic and transport impacts

- Oversized deliveries will arrive and depart from the station box and Edmund Herring Oval sites throughout November.
- Traffic changes will take place on Toorak Road West to facilitate ground and environmental investigation works.
- Please be mindful of the new traffic arrangements since the completion of the St Kilda Road realignment.
- Service investigations will take place throughout the precinct in November. These works include scanning and opening of access pits. These works may cause some pedestrian closures during standard construction hours.
- The site sheds from the Albert Road site shed complex will be removed during standard construction hours in November. These works will cause some pedestrian, cyclist and vehicle delays and detours in the area while barriers are moved, and trucks are loaded.

Business support

While the Metro Tunnel Project will be a significant boost for Melbourne, construction activities in a busy environment can be challenging for local businesses.

In response to this, our Business Support team assists businesses through the disruption and any permanent changes that take place.

Please see the offer in this notification from Leelawadee Thai Massage & Skin Care, 398 St Kilda Road, Melbourne.

We look forward to promoting more local businesses as the Project progresses.
