

WORKS NOTIFICATION

24/7 CONSTRUCTION SOUTH YARRA SIDING RESERVE **WEDNESDAY 11 TO WEDNESDAY 18 DECEMBER**

Works to build the eastern tunnel entrance in South Yarra are progressing, with construction of the tunnel base slab continuing throughout December. To ensure the base slab of the new tunnel entrance is secure and in place for critical works in January, a period of 24/7 works to install steel within the tunnel will take place in December.

What we are doing

- Delivering materials to site and welding steel sections
- Installing and fixing steel that will form the new tunnel base slab
- The works will be contained to a small section inside the new tunnel structure and will require the use of hand tools.

When

- 24/7, Wednesday 11 to Wednesday 18 December.

What to be aware of

- These works are expected to generate low levels of noise
- These works will be completed under directional lighting to ensure the safety of our workers. Every effort will be made to direct these lights away from homes
- Additional truck movements as the steel is delivered to site
- Following these works there will be a concrete pour for the tunnel base slab. This will take place during normal construction hours.
