

WORKS NOTIFICATION

TEMPORARY TRAFFIC CHANGES TENNYSON AND DERBY STREETS, KENSINGTON LATE JULY TO SEPTEMBER 2020

Works are continuing at the western tunnel entrance in Kensington. From 27 July, work will commence to construct the final six permanent concrete support props and the tunnel entrance concrete roof slab.

To undertake concreting and steel works safely, a concrete pump and crane will be positioned on Childers Street which will at times prevent construction vehicles accessing parts of the worksite.

During these works, some construction vehicles will be detoured to access the worksite through Derby and Tennyson streets during normal working hours.

What we are doing

Propping works

- Undertaking four concrete pours which will require a concrete pump to be positioned on Childers Street
- Redirecting up to 10 construction vehicles along Derby and Tennyson streets while concreting works occur.

Roof slab works

- Using a large crane to lift steel cages from delivery trucks into place
- Undertaking approximately 10 concrete pours to construct the tunnel entrance roof slab
- Redirecting approximately six construction vehicles along Derby and Tennyson streets while these works take place
- No concrete trucks will be redirected during these works.

When

Propping works

- Up to 10 construction vehicles per day will be detoured between 7am and 6pm, for four days, between Monday 27 July to Saturday 8 August 2020
- Concrete pours are not expected to take a full day. Childers Street will be reopened to all construction vehicles if concreting works are completed early.

Roof slab works

- Up to 10 construction vehicles per day will be detoured between 7am and 6pm, for 10 days, between Monday 10 August to September 2020
- Works are not expected to take a full day. Childers Street will be reopened to all construction vehicles if concreting or crane works are completed early.

What to be aware of

- Up to 10 construction vehicles per day will use Derby and Tennyson streets to access the worksite
- Vehicles accessing Derby and Tennyson streets will include utes, small trucks, and larger delivery trucks. Where possible, larger deliveries will be scheduled on days when there are no concreting works scheduled
- All other construction vehicles will continue to access the worksite from Childers Street during concrete pours and crane lifts.
- Additional traffic controllers will be placed on Derby and Tennyson streets, to ensure safe vehicle movements
- There will be periods of low level noise associated with construction vehicle movements.

SMS notification reminders

If you wish to be added to the project's SMS reminder notification system, please email the project team at RIACommunications@metrotunnelria.com.au.

SMS reminders will be sent prior to confirmed concrete pours that require some construction vehicle detours via Derby and Tennyson streets.

Health and safety

The health and safety of our workers and the community is our key priority as we continue to deliver the Metro Tunnel Project, as is supporting physical distancing measures in line with current health advice.

We have strict protocols in place to protect the safety of our construction workforce, including enhanced industrial cleaning arrangements, provision of personal protective equipment and measures to reduce staff contact, including staggered shifts.
