

WORKS NOTIFICATION

RAIL TRACK UPGRADE WORKS TOTTENHAM

10 JUNE - 10 JULY 2019

As part of the Metro Tunnel Project, work is being undertaken in various locations along the Sunbury rail corridor, including track modifications and construction of a new passenger platform at West Footscray station.

To support these works, we will soon commence works within the rail corridor to upgrade a section of V/Line track around Tottenham station.

What we are doing

- Removing two sections of outdated rail track
- Installing replacement sleepers and track in a new alignment, including rock breaking using an excavator
- Compacting ballast (crushed rock) under the newly laid rail tracks using a ballast tamper, a machine used to compact crushed rock under track to align it to its final position
- Removing and transporting excess construction material to a site compound at the corner of Rupert and Ashley streets.

When

- 7am to 6pm, Monday to Friday
- 7am to 1pm, Saturdays.

What to be aware of

- These works are expected to produce medium to high levels of noise and medium levels of vibration from construction vehicle movements, rock breaking and as crushed rock is compacted
- These works are expected to produce medium levels of dust. A water cart will be used to dampen the soil to minimise the spread of dust
- Construction vehicles will be accessing the rail corridor via Sunshine Road.
