

WORKS NOTIFICATION

OUT OF HOURS SERVICE UPGRADES RAIL CORRIDOR, MALVERN STATION **MONDAY 9 TO SUNDAY 15 MARCH 2020**

As part of the Metro Tunnel works to construct the eastern tunnel entrance in South Yarra, we will be undertaking service investigations and installing cable conduits along the rail corridor in Malvern. The conduits will hold power and communication cables to support the new rail line upgrades.

What we are doing

- Non-destructive digging (NDD), to locate and expose underground services and cables near Malvern Station. NDD works will take place during normal construction hours
- NDD uses pressurised water to break up soil and vacuums the soil to expose services located underground without damaging them
- Excavation, drilling and digging to install the new cable conduit during 24/7 works
- Pouring concrete to provide support for the new cable conduits
- These works will involve a small work crew with an excavator, elevated work platform, drill and hand tools.

When

Non-destructive digging

- Monday 9 to Friday 13 March
- 7am to 6pm.

Installation of new infrastructure

- 24/7 works will take place from Friday 13 to Sunday 15 March.

What to be aware of

- Additional truck movements will be required during the 24/7 works, as materials are delivered from our rail access points at the Malvern Woodyard and the carpark near Malvern station to the work site
- These works are expected to generate medium levels of noise with some periods of high level noise
- At night these works will be completed under directional lighting to ensure the safety of our workers. Every effort will be made to direct these lights away from homes
- There will be traffic management and lane closures in place along Dandenong Road, while we complete works on the rail corridor. Some parking will also be removed along Station Street. Access to nearby businesses and residential properties will be maintained.
