

# Works Notification

## Relocatable equipment building (REB) works

Malvern station, Malvern

October 2021

Internal fit out to the REB located at Malvern station are progressing. Works to connect power from the REB to the existing power supply will commence in October.

### What we are doing

- Removing vegetation located within the rail corridor to place a power switchboard
- Constructing a concrete base slab for the switchboard
- Trenching underground to install conduits, earth grid and connect electrical power from the REB and to the existing power supply located at Station Street
- Works will involve a small excavator, an elevated work platform, a concrete pump, concrete trucks, a non-destructive digging (NDD) truck. NDD uses pressurised water to dig and then vacuum up the soil to expose any existing underground assets and services without damaging them.

### When

#### Out of hours works

- 10pm to 7am, Monday to Friday
- From Tuesday 18 October to Friday 29 October.

#### Day works

- 7am to 6pm, Monday 1 November to 5 November.

### What you should be aware of

- Works are expected to generate medium levels of noise and high-level peaks while the NDD truck and concrete pumps are in progress
- Traffic management will be in place to facilitate pedestrian movement
- Temporary on street parking removal along Station Street will be in place to ensure works are undertaken safely and efficiently
- To avoid any train disruption and ensure the safety of the community, these works will be undertaken outside normal construction hours while trains are not running.

### Health and safety

Works will resume safely from 5 October on the Metro Tunnel with COVID-Safe Plans in place to help protect workers and the community.

Strict processes are in place to check and record the vaccination status of workers entering construction sites.
