

Name *that Station*

EVALUATING STATION NAMES WORKSHEET

What names would you have chosen for the new Metro Tunnel stations that will be built for Victoria's biggest ever public transport project?

Station Naming Criteria

List up to five criteria you think would be useful for assessing whether a proposed name for a station is appropriate.

Criteria 1:

Criteria 2:

Criteria 3:

Criteria 4:

Criteria 5:

Once you have finalised your station naming criteria, use the table on the next page to evaluate naming suggestions.

➡ Turn over

Evaluating Station Names

Record each naming suggestion in the table below and then assess it against the criteria you have developed.

- Write **Yes** or **No** in the boxes depending on whether or not you feel the name meets the criteria.
- Or use a point scoring system (1 = not suitable, 5 = most suitable) to provide a measured assessment of how well the name meets each of the criteria.

The final column provides a space to enter your evaluation of each name.

- Is it more **Yes** or **No**?
- Or total the points for each name to identify a winner.
