

## WORKS UPDATE

### SITE ESTABLISHMENT, PARKVILLE

Further to the Parkville Precinct June-July Construction Update, additional site establishment activities are required to prepare the site for piling and excavation.

#### What we are doing

##### Tree removal works

Tree removals will take place within University of Melbourne land, east of the Medical building and west of Gatekeeper's Cottage.

Following the removal of trees within the vicinity of Gate 10 earlier this year, two tree stumps will need to be ground down to street level.

##### Traffic light removal

Two redundant traffic lights will be removed from the vicinity of Gate 10.

##### Service reinstatement

Following service investigations, backfill and reinstatement works are required at five locations:

- Corner of Grattan and Barry streets
- Three locations along Berkeley Street
- Intersection of Grattan and Leicester streets.

#### What to be aware of

##### Tree removals

- Fauna inspections will be undertaken prior to any tree removal and a qualified fauna handler will be on site at all times during this activity
- Tree removal will involve the use of chainsaws (electric and petrol) and a stump grinder
- All necessary permits and approvals for the removal of these trees have been received
- Temporary fencing will be installed around the site. There may be a requirement for this temporary fencing to occupy car parks on Kernot Road to ensure the safety of pedestrians
- These works are expected to generate high levels of noise.

##### Traffic light removal

- This activity will involve the use of a saw cutter and a small crane
- These works are expected to generate low to medium levels of noise. There will be short periods of high level noise during the use of the saw cutter.

##### Service reinstatement

- These works will involve the use of a small excavator to remove the steel plate currently covering the pit, followed by backfill and reinstatement to similar or original condition
- These works are expected to generate low to medium levels of noise.

##### Pedestrians and cyclists

- Access for pedestrians and cyclists will be maintained around the work site, however at times localised diversions may be required
- Traffic management will be in place to ensure pedestrian and cyclist safety.

#### When

- 7am - 6pm, Saturday 21 July 2018

#### More information

If you have any questions, please phone the Metro Tunnel Project Information Line on **1800 105 105** (press 2 and follow the prompts).
