

## WORKS NOTIFICATION

### SITE ESTABLISHMENT DERBY ROAD, SUNSHINE FROM MONDAY 26 AUGUST 2019

The Metro Tunnel will free up space in the City Loop to run more trains to and from the suburbs by taking our busiest train lines through a new tunnel under the city. That means more trains across Melbourne, with a less crowded and more reliable train network.

#### About High Capacity Signalling

Next-generation High Capacity Signalling is the technology that will be installed in the Metro Tunnel to deliver more trains during peak periods.

This technology will revolutionise Melbourne's train network as we move towards a 'turn-up-and-go' network like other cities such as London, Singapore and Hong Kong.

Signal Control Centres are the nerve system of the High Capacity Signalling technology and the Metro Tunnel Project is building one in Sunshine.

This state-of-the-art centre will monitor and operate High Capacity Signalling and all train movements on the Cranbourne, Pakenham and Sunbury lines, including through the Metro Tunnel.

Following extensive consideration, Sunshine was determined the ideal location for the signal control centre due to its connection points for metropolitan, regional and freight rail services.

To support these works, we are establishing a construction site at 75A Derby Road, Sunshine, which is where the control centre will be built.

The site will include temporary offices, storage, worker amenities and construction vehicle parking.

#### What we are doing

##### Monday 26 August – December 2020:

- Excavation and earthworks to prepare the site for the installation of temporary site sheds, offices and car parking areas
- Local conduit trenching to enable service connections; including Non-Destructive Digging to identify the locations of underground services
- Installation of barrier fencing and environmental controls
- Equipment will include excavators, water trucks, bulldozers, rollers, street sweepers, graders, haulage trucks and small mobile cranes
- The site will be used as a site office and for delivery and storage of construction materials and equipment
- Ongoing use of the site as required during Metro Tunnel construction.

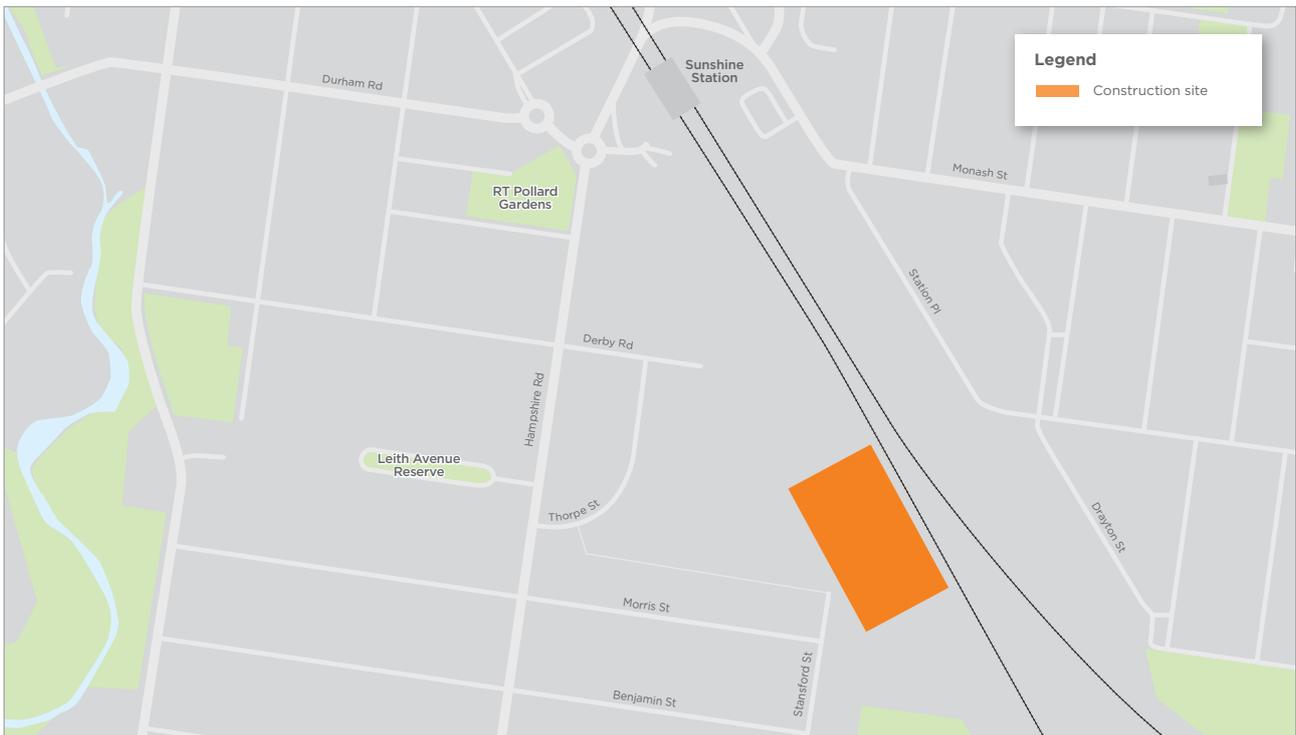

## When

### Construction site establishment and use:

- 7am to 6pm, Monday to Friday
- 7am to 1pm, Saturdays.

## What you should be aware of

- Medium levels of construction noise are expected during site establishment activities
- Machinery such as excavators, rollers, graders, water trucks and street sweepers may cause some dust and vibration to nearby areas
- Increased truck and machinery movements on and around Hampshire Road and Derby Road, Sunshine
- Traffic management will be in place temporarily as required to control increased volumes of construction vehicles, trucks and machinery movements to and from the site.
