

## WORKS NOTIFICATION

# GROUND MONITORING EQUIPMENT INSTALLATION, SWANSTON STREET AND FLINDERS STREET JUNE 2019

Major construction is continuing in the CBD at the site of the future Town Hall Station. Ground monitoring equipment needs to be installed across the project to enable the monitoring of any ground movement during excavation and tunnelling works. This update provides an outline of upcoming night works on Swanston Street for the installation of ground monitoring equipment throughout June.

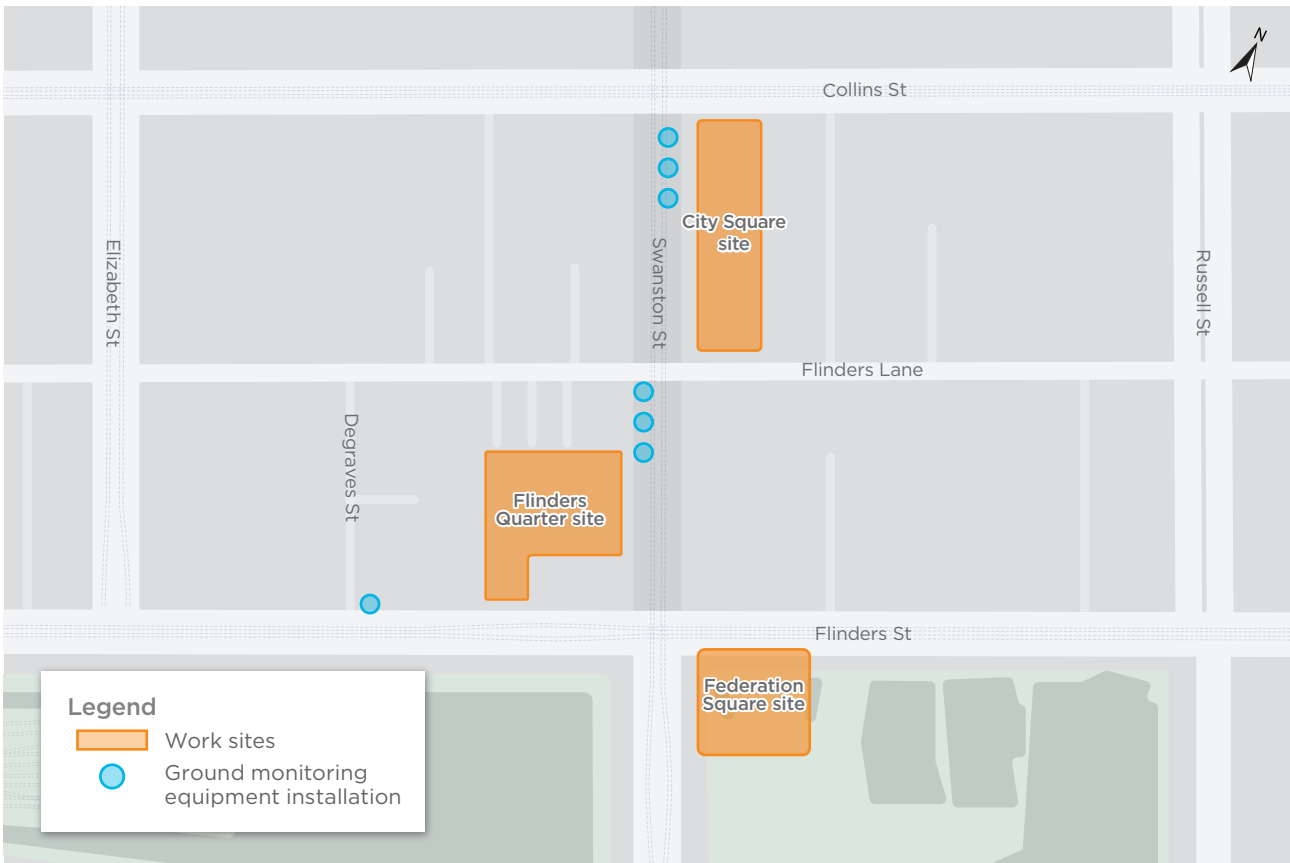

### What we are doing

- Investigations for geotechnical works will occur on the Swanston Street tram tracks between Collins Street and Flinders Street, and at one location on Flinders Street near the Campbell Arcade Subway Entrance
- Investigations involve the use of a drill to remove a cylinder of material in the road surface known as coring
- Coring works will occur over five nights after the last tram in the evening and before the first one the following morning and are expected to generate medium to high levels of noise

- Geotechnical Installation works will also occur and involve scanning the area, saw cutting, non-destructive digging, and the use of a drill rig to install equipment, these works are expected to generate low levels of noise
- There may be some localised traffic and pedestrian changes during these works.

### When

- 1am to 5am, 11 June to 13 June and 17 June to 20 June

Indicative only
