WORKS NOTIFICATION

24/7 ACCESS AND EQUIPMENT LAYDOWN AREA
402-416 CHAPEL STREET, SOUTH YARRA
WEDNESDAY 1 TO FRIDAY 31 JANUARY 2020

During January, major infrastructure upgrades continue for the Metro Tunnel as we prepare our network for bigger, better trains and deliver improvements for passengers across Victoria. These upgrades include 24/7 works in the rail corridor between South Yarra and Malvern stations.

The project has been using the land located at 402-416 Chapel Street as a laydown area for materials and equipment to support construction of the tunnel entrance. This site will continue to be accessed during the January 24/7 rail works.

What we are doing

• Trucks will be taking previously stored crushed rock and equipment to work sites across South Yarra
• Moving essential equipment in and out of the laydown area.

What to be aware of

• Additional truck movements will be required as materials are delivered to and from site along nearby streets
• Crushed rock will be watered down before being transported from site, to help suppress dust
• Some parking will be temporarily removed along Bray Street, to ensure trucks can move safely in and out of the area
• Temporary lighting will be on site to ensure worker safety. Where possible, lighting will be directed away from residential properties
• A small shed will also be installed on site, to provide work crews and security with worker amenities
• Low to medium levels of noise are expected while we complete these works with some periods of high-level noise as crushed rock is removed from site
• Buses will be replacing trains from Thursday 2 to Friday 31 January visit www.ptv.vic.gov.au for more information.
