

## WORKS NOTIFICATION

# SITE ESTABLISHMENT & DEMOLITION WORKS, NORTH MELBOURNE SUBSTATION JANUARY - FEBRUARY 2020

To construct an electrical substation to provide power to the Metro tunnel's twin nine-kilometre rail tunnels and new underground stations, site establishment activities and associated works need to be completed.

### What we are doing

The North Melbourne substation is an essential piece of infrastructure that will provide a high-voltage connection between the West Melbourne Terminal Station, located adjacent to the Moonee Ponds Creek, and the site of the new North Melbourne Station.

The construction of the substation will be carried out in stages, the first stage (site establishment and demolition works) is expected to take up to three months to complete and involves the demolition of old infrastructure and site preparation activities.

Major construction of the substation is expected to commence in April 2020, following approval of the substation Development Plan by the Minister for Planning.

#### Site establishment and demolition works:

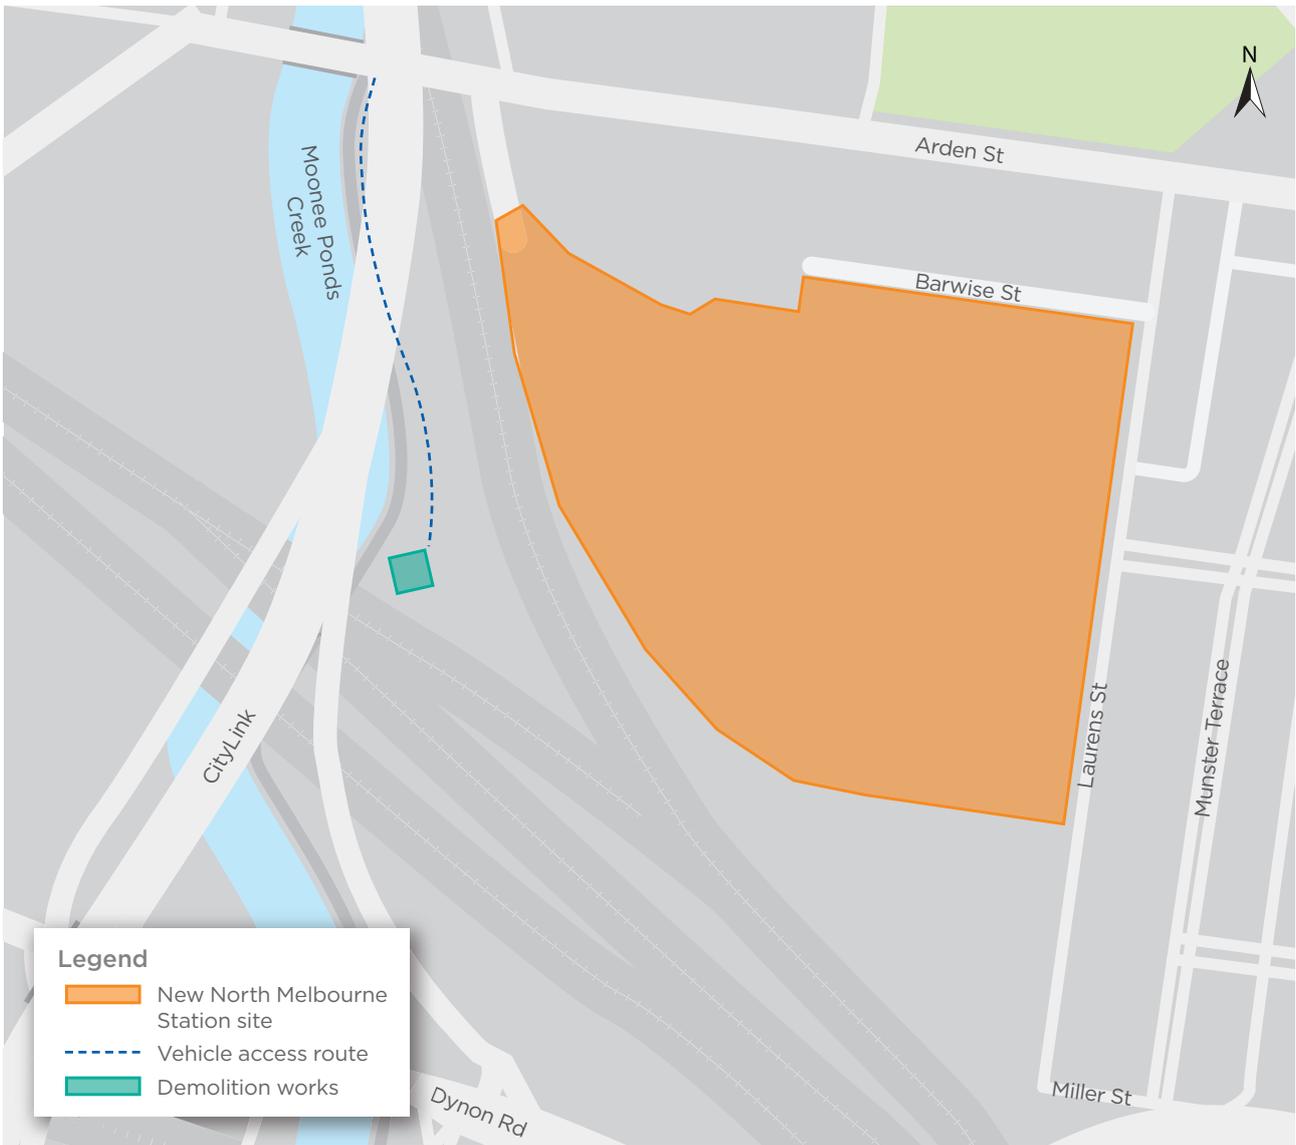

- Installing fencing and hoarding around the site perimeter
- Delivering equipment and workforce amenities to site
- Using excavators to demolish old infrastructure
- Removing debris from site using trucks.

### What to be aware of

- Construction traffic will access the site using the existing access track off Arden Street (see map overleaf)
- Traffic management will be in place to manage vehicles entering and exiting the site
- Demolition works will generate periods of medium to loud noise
- These works will not impact the Moonee Ponds Creek trail, and pedestrian and cyclist access will be maintained at all times
- Environmental protection controls will be in place throughout construction of the substation. This includes regular sampling of creek water and ensuring stockpiles are located at a minimum distance of 10 metres from drainage infrastructure and the Moonee Ponds Creek.

### When

- From Monday 20 January for up to three months
- 7am to 6pm, Monday to Friday
- 7am to 1pm, Saturdays
- Demolition works are expected to take up to five days. Other site establishment activities will continue once this is complete
- Further updates will be provided.

Indicative only

**Legend**

- New North Melbourne Station site
- Vehicle access route
- Demolition works
