

RAIL INFRASTRUCTURE ALLIANCE

WORKS NOTIFICATION

24/7 CABLE INSTALLATION AND SIGNALLING WORKS - CHAPEL STREET TO HAWKS BURN STATION **TUESDAY 9 TO SATURDAY 13 JULY**

Further to the works notification dated 14 June, we wish to advise the 24/7 cable installation and signalling upgrades have been rescheduled to start from 9 July 2019. This notification provides a reminder of the works which will be undertaken within the rail corridor between Chapel Street and Hawksburn station while trains aren't running.

What we are doing

Works will include:

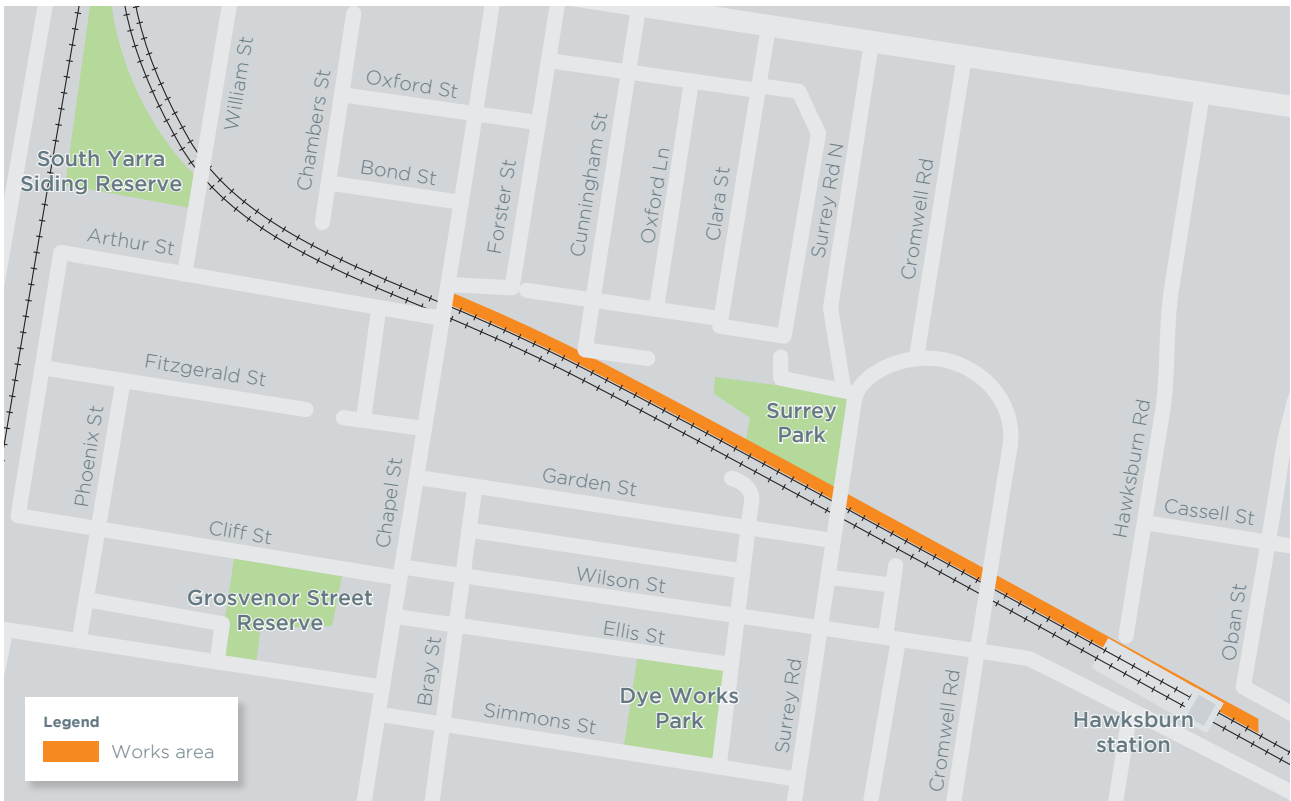

- Non-destructive digging (NDD) to locate underground services
- Trenching and excavation to remove redundant cables and lay new cables to power the new train lines in South Yarra
- Overhead wire removal and reinstatement
- These works will involve the use of excavators, drills, an elevated work platform and hand-tools
- NDD uses pressurised water to break up and vacuum soil to expose assets and services located underground without damaging them.

When

- Tuesday 9 to Saturday 13 July
- 24/7 works, beginning after the last passenger service on Tuesday evening and finishing before the first passenger service on Saturday morning
- These works are required to take place while the rail lines are shut down to ensure the safety of our workers.

What to be aware of

- These works are expected to generate medium levels of noise, with some periods of high-level noise
- These works will be completed under directional lighting to ensure the safety of our workers. Every effort will be made to direct these lights away from homes
- Additional truck movements will be required as dirt and spoil are removed from the rail corridor
- Please note other works to upgrade the rail network will also be undertaken in the South Yarra area during this time. For more information on these works please visit bigbuild.vic.gov.au or to plan your journey visit ptv.vic.gov.au.
