

# Works Notification

## Sunshine Signal Control Centre construction

Derby Road, Sunshine

From February to September 2020

Construction is continuing at Sunshine to build a signal control centre required for the Metro Tunnel Project.

### About the signal control centre

Located at Sunshine, the signal control centre is where signallers will support the management of all train movements on the Sunbury line, including through the Metro Tunnel.

The control room inside the centre will be fitted-out with High Capacity Signalling equipment to provide a dynamic, real-time, overview of train movements across the network.

Sunshine was chosen as the location for the signal control centre because it is a connection point for metropolitan, regional and freight rail services.

### What we are doing

- Excavation and earthworks to prepare the site for construction of the building, car parking and access road
- Construction of the signal control centre building and a dedicated access road from Derby Road
- Trenching to install cables for service connections
- Constructing an access road to the Signal Control Centre and installing fencing for the perimeter of the compound
- Landscaping
- Equipment will include excavators, water trucks, bulldozers, rollers, street sweepers, graders, haulage trucks and mobile cranes.

### When

- 7am to 6pm, Monday to Friday
- 7am to 1pm, Saturdays.

### What you should be aware of

- These works are expected to generate medium levels of noise. Dust mitigation methods will be in place on site
- Increased truck and machinery movements around Hampshire and Derby roads, Sunshine
- Traffic management will be in place, as required, to help manage construction vehicles, trucks and machinery movements to and from site
- This site will be used as a site office and for storage of construction materials and equipment.
