As part of the Metro Tunnel works to construct the eastern tunnel entrance in South Yarra, we will be installing retaining walls along Normanby Road. The retaining walls will be used to support cables and rail signals that will power the new trains.

**What we are doing**

- Installing retaining walls by excavating into the ground
- Installing precast concrete panels, and securing them in place with additional concrete
- These works will involve the use of excavators, hand tools, concrete pumps and asphalting equipment.

**What to be aware of**

- These works are expected to generate medium levels of noise, with some periods of high-level noise
- A lane closure will be required to safely distance local traffic from equipment while it is in use
- Some parking will temporarily be removed during this time to allow for two-way traffic on Normanby Road. Traffic management will be in place to manage this safely.

**When**

**Monday 20 July to Friday 14 August**

- 7am to 6pm, Monday to Friday
- 7am to 1pm, Saturday.
Health and safety

The health and safety of our workers and the community is our key priority as we continue to deliver the Metro Tunnel Project, as is supporting physical distancing measures in line with current health advice.

We have strict protocols in place to protect the safety of our construction workforce, including enhanced industrial cleaning arrangements, provision of personal protective equipment and measures to reduce staff contact, including staggered shifts.
