

Regional lines

The Metro Tunnel will save you time

By creating extra space in the City Loop, the Metro Tunnel means more trains, more often across Melbourne, and will save you time travelling to Parkville and St Kilda Road.

**More trains,
more often**

What does the Metro Tunnel Project mean for regional Victoria?

Construction is underway on the Metro Tunnel, Victoria's biggest ever public transport project. It will deliver five new underground stations at North Melbourne, Parkville, State Library at the northern end of Swanston Street, Town Hall at the southern end of Swanston Street and Anzac on St Kilda Road. The two new CBD stations will connect directly to City Loop services at Flinders Street and Melbourne Central stations via underground walkways.

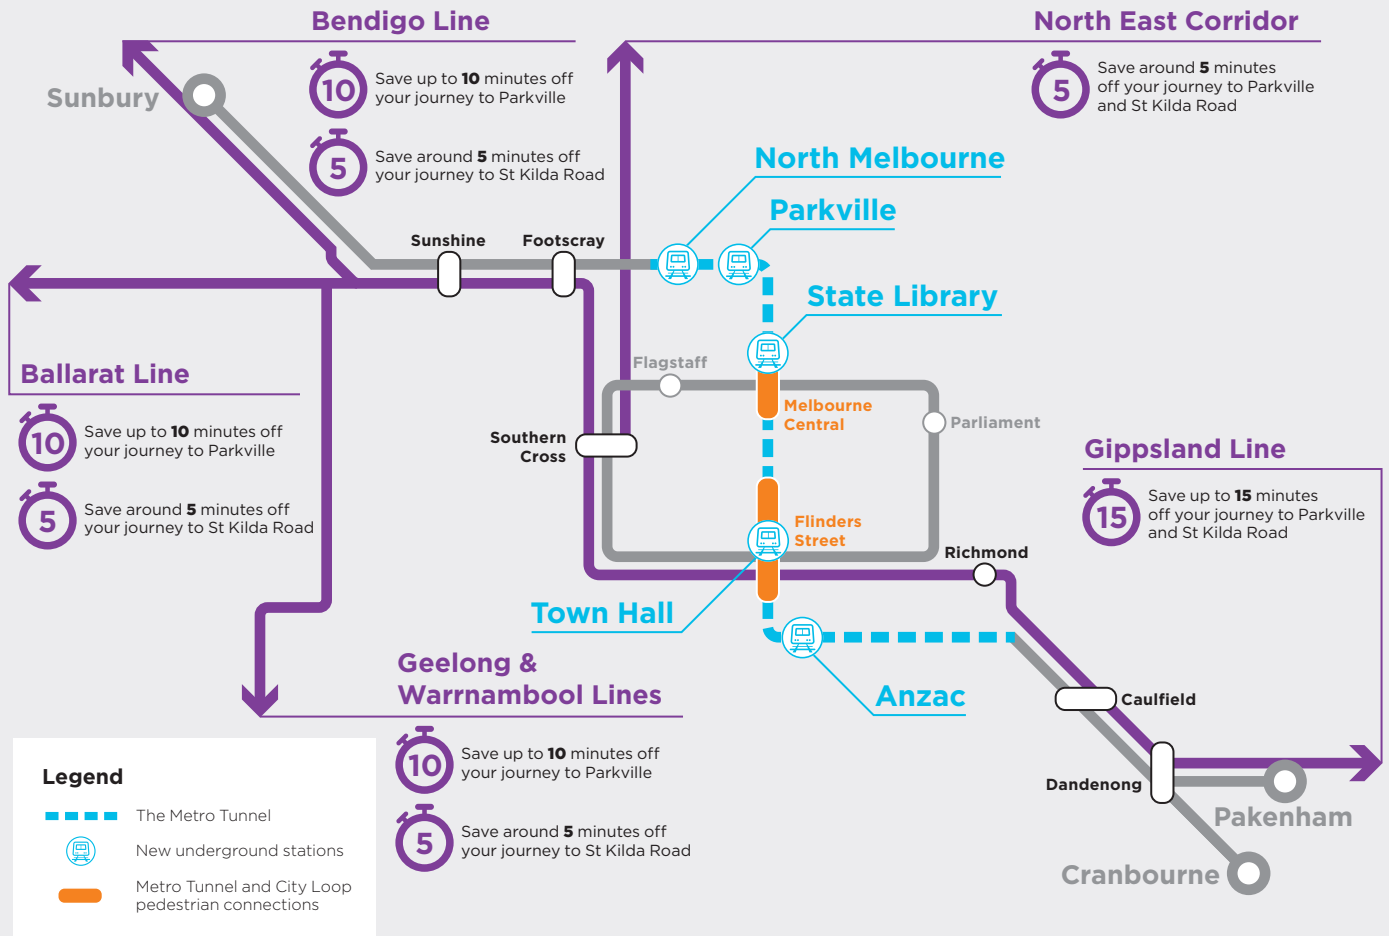

Less congestion on our metropolitan rail network means your journeys into the city and Southern Cross Station will be easier and more reliable when the Metro Tunnel opens from 2025.

Saving you time

Melbourne bound regional passengers will take time off their trips to Parkville and St Kilda Road by changing onto Metro Tunnel services.

Hassle-free connections

The Metro Tunnel will deliver more convenient journeys and hassle-free connections for train passengers every day.

How does the Metro Tunnel benefit our train network?

-  Creates room to run more trains, more often, on lines across Melbourne
-  7,000 jobs created during construction
-  Connects some of the city's key destinations to Melbourne's train network for the first time
-  Direct services to Melbourne's leading universities, hospitals and employment areas
-  Reduces crowding at CBD stations

Wider benefits

-  More train trips will reduce road congestion
-  Lays the foundation for a truly international style metro system with turn up and go services
-  Triggers the urban renewal of key areas of Melbourne
