WORKS NOTIFICATION

TEMPORARY CAR PARK CLOSURES
WEST FOOTSCRAY STATION
8 JUNE – EARLY SEPTEMBER 2020

Major construction is continuing along the Sunbury rail corridor in preparation for the Metro Tunnel. To enable the installation of new power, communications and signalling services, we are temporarily closing sections of the West Footscray station car park to public use.

What we are doing
• Temporarily closing some car parking spaces in the southern West Footscray station car park
• Temporarily closing the entire northern West Footscray station car park
• Delivering and storing construction materials on site
• Non-destructive digging to investigate ground conditions and confirm the area is free of underground services
• Using excavators and boring machines to dig underground
• Installing communications and power services in excavated trenches
• Asphalting over excavated trenches and returning the car park to public use.

When

Southern West Footscray car park closure
• Monday 8 June to Friday 24 July 2020.

Northern West Footscray car park closure
• Monday 27 July to early September 2020
• Please note that the dates above may change slightly as works progress, depending on productivity in changing weather and soil conditions. Works will only be conducted in one car park at a time. On no occasion will the southern and northern car parks be closed simultaneously.

What to be aware of
• Ground conditions in the local area contain basalt rock which, if encountered, will need to be broken to facilitate these works
• These works are expected to produce medium levels of noise and low levels of vibration, with intermittent periods of high level noise during any rock breaking activities
• Traffic controllers will be present at times to assist vehicle and pedestrian movements around construction sites. Please follow the instructions of traffic controllers and drive safely.
Health and safety

The health and safety of our workers and the community is our key priority as we continue to deliver the Metro Tunnel Project, as is supporting physical distancing measures in line with current health advice.

We have strict protocols in place to protect the safety of our construction workforce, including enhanced industrial cleaning arrangements, provision of personal protective equipment and measures to reduce staff contact, including staggered shifts.
