

WORKS NOTIFICATION

GROUND WATER MONITORING UPDATE 8 JULY - 21 AUGUST 2018

Major works on the Metro Tunnel are underway to support construction of the new State Library Station at the northern end of Swanston Street in the CBD.

What we are doing

From 8 July through to 21 August, we will be undertaking works to connect groundwater monitoring stations on Victoria Street (between Swanston and Therry streets). These stations will allow us to monitor groundwater conditions during construction.

Connecting the groundwater monitoring stations will involve:

- Saw cutting the road surface
- Using an excavator and non-destructive digging truck to locate services on Bouverie Street and for trenching works on Victoria Street
- Excavation of the road surface and installation of pipes between the groundwater monitoring stations on the east and westbound lanes of Victoria Street and on Bouverie Street
- Relocation of a water main beneath the eastbound lanes on Victoria Street, between Bouverie and Swanston Street, to accommodate pits and pipes
- Reinstatement of the road.

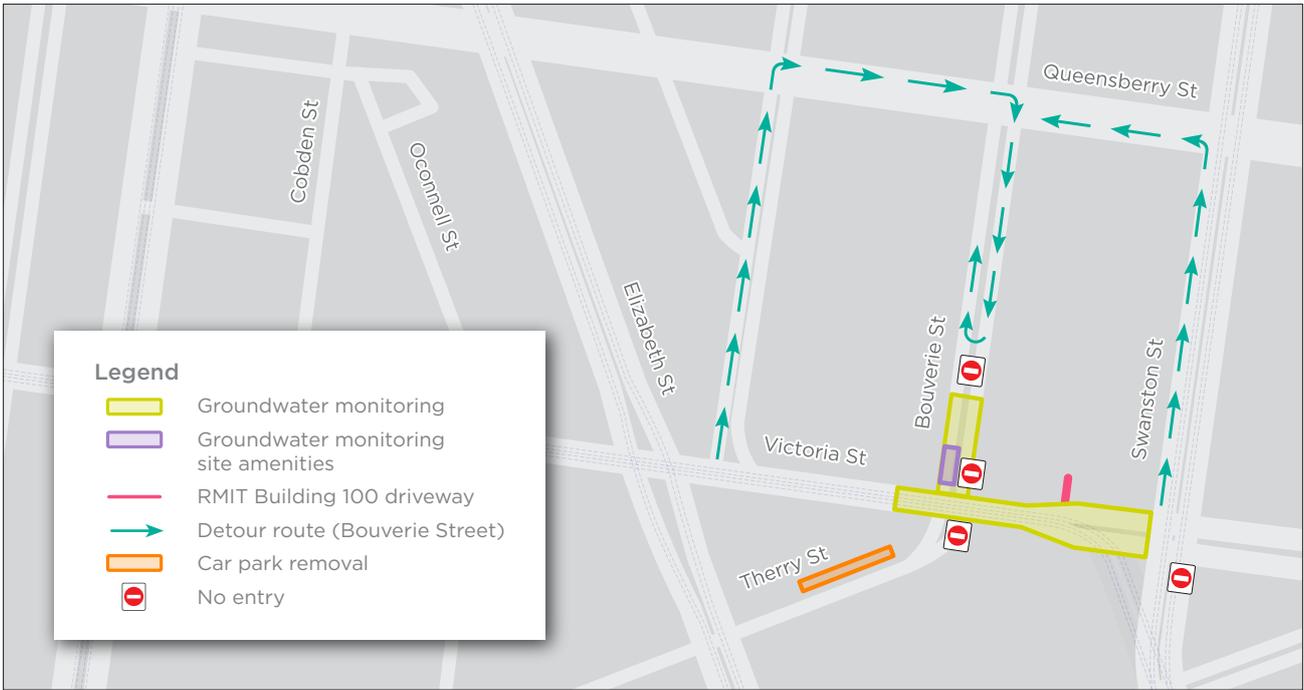

When

- 8 July to 21 August 2018
- 7am - 6pm, Monday to Saturday
- 6pm - 7am, Sunday to Friday.

Please be advised works will continue on the groundwater monitoring system until October 2018. We will provide you with a further update before the next stage of works commence.

What to be aware of

- Concrete barriers will be installed on the westbound lanes of Victoria Street to allow these works to be carried out safely during the day, minimising the extent of night works required. Access to RMIT Building 100 and the Audi Centre car park will be maintained at all times
- Two lanes on Victoria Street will be maintained in both directions during the day
- Night works will also be necessary. One lane in each direction on Victoria Street will be maintained during night works
- Bouverie Street will remain closed at the intersection of Victoria Street
- Up to 12 car parking spaces will be occupied in the centre median of Bouverie Street
- There will be no access into Therry Street from Victoria Street during these works
- These works are expected to generate periods of medium to high level noise during the day
- Works will be planned to ensure noisier activities, including road sawing and non-destructive digging occur before 10pm, where possible
- The temporary removal of four car parking spaces on Therry Street is needed to allow for bus movements
- Active traffic management will be in place to safely guide pedestrians, cyclists and vehicles around work areas
- Night works will be managed in accordance with the Metro Tunnel Project Environmental Performance Requirements.

Indicative only.
