WORKS NOTIFICATION

OVERNIGHT WORKS
CHAMBERS STREET, SOUTH YARRA
MONDAY 17 TO WEDNESDAY 19 FEBRUARY

Works to build the eastern tunnel entrance in South Yarra are progressing, with construction of the tunnel decline structure continuing throughout February. Sections of steel, that will provide structural support to the tunnel decline structure, will be delivered to site and lowered into the rail corridor from Chambers Street while trains are not running overnight.

What we are doing
- Delivering a crane to site during normal construction hours, which will be used to lower steel into the rail corridor
- Lowering steel into the rail corridor, while trains are not running overnight
- The steel will then be used to create the new tunnel decline structure during normal construction hours.

What to be aware of
- These works are expected to generate medium to low levels of noise
- These works will be completed under directional lighting to ensure the safety of our workers. Every effort will be made to direct these lights away from homes
- Additional truck movements as the steel is delivered to site.

When
- Out of hours works will take place from Monday 17 to Wednesday 19 February.
- Works will begin after the last passenger service each evening and will cease before the first passenger service each morning.
